## Our Strength is Your Support

Universal Manufacturing Corporation has been pioneering high-quality American made, steel scaffolding, shoring and custom fabricated access equipment for more than 88 years. If you are looking for dependable Frame, Shoring, System, Tube & Clamp, Custom, or your current inventory scaffolding, Universal has a cost-effective solution for you.

Universal is committed to designing, producing and delivering the highest quality American-Made scaffolding to our customers around the world — competitively and on time.

Robert L. Carbeau,  
President

# U UNIVERSAL MANUFACTURING

Your complex custom access projects require engineered precision and the most trusted materials. Whether you are in need of custom access engineering and fabrication, engineering services for a custom scaffold build, or a quality line of scaffolding to match your existing inventory, Universal Manufacturing will exceed your expectations. Our experienced engineering team dedicate themselves to accuracy and the details necessary to bring innovative design, safety and cost efficiency to all project layouts. Our full-service engineering team also provides all of the R&D and testing your projects require. Using only the latest technologies and quality materials, we have consistently achieved the highest standards in manufacturing scaffolding for more than 88 years.

When you need custom access, you need Universal Manufacturing.

# Universal Mobile2 Maintenance Platform

## Universal's Mobile2 Maintenance Platform Scaffolding is perfect for off-the-floor work required by building trades.

### Portable

- Engineered for quick assembly and adjustment by one person.

### Adaptable

- Performs around stairways, escalators, ramps and on uneven floor environments.

### Adjustable

- Mobile2 easily adjusts in 2" increments.

### Convertible

- Add additional Mobile2 Units to increase height or provide a larger platform area.

Mobile2 is the safe and versatile ultimate maintenance platform designed to move through standard size doorways, around corners, into elevators and in crowded areas where most utility scaffolds cannot be used. Our cross-bracing is under the platform, allowing movement over desks, chairs, file cabinets, machinery and other obstructions. Comes with locking casters. No tools required.

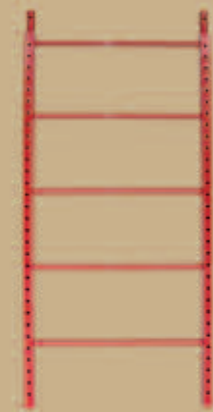

### Safe

- Steel frame deck with plywood is safely secured to the side rails with lock pins.

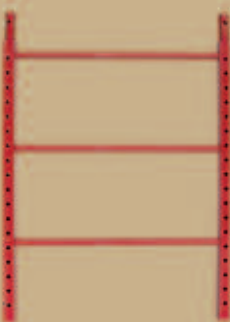

Our heavy-duty spring loaded safety lock mechanism assures a secure maintenance platform by locking into the frame at two locations.

## Components

M2F6ST

M2F3ST

Part I.D.	Product Description	Weight
M2F6ST	65" High x 29" Wide Panel	23.0 lbs
M2F3ST	39" High x 29" Wide Panel	14.0 lbs
M3C5	5" Caster	5.0 lbs
M2GP6ST	45" High x 70" Wide Guard Rail Set	76.0 lbs
MFS	67" Long x 28.5" Wide Deck	31.0 lbs
M2SR6ST	73.75" High x 18" Wide Side Rail	25.0 lbs
M2O4	18.5" Wide Outrigger	9.0 lbs
MOPL6	72" High x 29" Wide Mobile 2 Maintenance Platform	147.0 lbs
