U UNIVERSAL MANUFACTURING

Your complex custom access projects require engineered precision and the most trusted materials. Whether you are in need of custom access engineering and fabrication, engineering services for a custom scaffold build, or a quality line of scaffolding to match your existing inventory, Universal Manufacturing will exceed your expectations. Our experienced engineering team dedicate themselves to accuracy and the details necessary to bring innovative design, safety and cost efficiency to all project layouts. Our full-service engineering team also provides all of the R&D and testing your projects require. Using only the latest technologies and quality materials, we have consistently achieved the highest standards in manufacturing scaffolding for more than 88 years.

When you need custom access, you need Universal Manufacturing.
